Brief outline

Since its inception the “recycling *aktiv*” trade magazine has evolved into an indispensable technical magazine for all the recycling sectors.

Its concept to provide practical reporting on current programmes and developments in the field of machinery and plants for the entire recycling industry makes it the technical journal par excellence.

In the future, the focus will be even stronger on machine and plant engineering.

In addition to the material handling and transportation, scrap and metal, wear, wood and biomass, plastics, paper and cardboard, as well as the demolition and recycling of building materials sectors, process technology and engineering will be presented as another main topic under a new heading. These include in particular classifying and sorting, crushing, drying and mixing, pressing and conveying as well as collecting and cleaning.

Current news from associations and companies, Personalia, the new section on “Law and Politics” as well as background information on trade fairs and events effectively complete the spectrum.

“recycling *aktiv*” is still free of charge, i.e. the magazine is widely distributed. The target group is not only the decision-makers in technology and commerce, but owner and machine operators are also specifically addressed.

The fact that the magazine and the demonstration exhibition “recycling AKTIV” have the same name is no accident – it was chosen deliberately and intentionally.

2. The order is based on the conditions of the respectively valid advertising price list and the „General Terms and Conditions“.
3. The discounts specified in the advertising price list are only granted for ads published within one year. The period begins with the publication of the first ad, unless another starting date is agreed upon when the contract is concluded.
4. If ads are purchased within the one-year period, the advertiser is entitled to a discount if he has completed an order at the beginning of the period which entitles him to a discount from the outset on the basis of the price list.
5. No guarantee is given for the inclusion of ads in specific numbers, specific issues or at specific places in the magazine, unless the client has expressly made the validity of the order dependent on it.
6. The exclusion of competitors can only be agreed in the case of two opposite pages.
7. The order for an ad or insert shall only be rejected on the basis of uniform principles due to content, origin or technical form. The client will be notified of the rejection.

9. Proofs are only supplied upon express request. The client is responsible for the correctness of the returned proofs. If the client does not return the proof sent to him in due time, approval for printing shall be deemed to have been granted.
10. If a special size is not specified, the actual print height shall be used as the basis to calculate the price.
11. The invoice must be paid within the deadline indicated on the price list, unless a shorter payment period or advance payment has been agreed in specific cases.
12. In the event of late payment or deferment of payment, customary default interest as well as any collection costs incurred shall be charged; the publisher can postpone executing the order until payment has been made.
